

We would love to find out how it is to travel with our guide. Do you have any questions? How have you experienced the contacts with the traders? Have you had any problems? Tell us about both positive and negative events. On the same page you find "News and changes" there is a form. You may be anonymous. We never publish names and email addresses.

Please write and tell us about suggestions in new places. Next year's guide is the reward for whether it will be a new place. Feel free to send pictures.

Dear Motorhome Friends,

This is number three of News and amendments. A Swedish version is on the backside.

Due to the corona pandemic, 2020 will not look like any other year. Major restrictions on people's freedom of movement have been introduced. When you meet others, a distance of 1.5 - 2 m should be kept. Everyone should keep distance from others.

The Public Health Agency of Sweden:

We are urging people who are 70 or over to limit close contact with other people to avoid infection. You should stop using public transport and shops and stop going to places where there are lots of other people. Ask your family or neighbours to help with your food shopping or other errands.

Webaddress: <https://www.folkhalsomyndigheten.se/>

Staying out in compliance with the calls is most OK for health reasons.

A motorhome owner has a unique opportunity to increase his mobility by using his own motorhome. The public health authority's calls should be followed.

We haven't heard anything from our hosts, but we urge that if you plan a visit to a host, that you, in all cases, call ahead and inquire if a visit is appropriate.

Updates (includes those published in No. 1)
